From a Journal of the American Concrete Institute, January  
through December 1989

progress through knowledge

American Concrete Institute, Detroit, Michigan

Remove this section and include it with your January through December 1989 Volume 86 issues of the *ACI Materials Journal*.

Individually authored papers, committee reports, and abstracts of separate ACI publications are indexed in three categories:

1. Title.....Abrasion resistance of roller compacted concrete (86-M53) Antonio Nanni Nov.-Dec. 1989.....559
2. Author.....Nanni, Antonio—Abrasion resistance of roller compacted concrete (86-M53) Nov.-Dec. 1989.....559
3. Subject.....Roller compacted concrete—Abrasion resistance—Test procedure selection and evaluation (86-M53) Nov.-Dec. 1989 .....559

Numbers in the parentheses with each entry constitute the title number of the paper or report. The first

number is the number of the volume in which the paper appeared; the second number is the number of the paper in the volume. For abstracts, which are not assigned a paper number, the identifying abbreviation AB is given; i.e., (86-AB). The month and year indicate the issue in which the material appeared. Page numbers indicate the first page of the item.

Discussion is identified as "Disc." and is indexed under the paper title and the name of each contributor to the discussion. Only discussion which appears in V. 86 is covered in this index. To find discussion of a paper, check the notice given in the issue in which the paper appeared. This notice will indicate where any discussion that developed is published. A similar notice is given with the abstracts of symposia publications. Discussion of symposia papers usually appears one year following publication of the abstract.
